X-R-I Testing Opens NDT Lab In Greer, SC

December, 2012 – X-R-I Testing (Troy, MI), a nationwide leading provider of nondestructive testing (NDT) services to the aerospace, power generation, and automotive industries announces the opening of their new testing facility in Greer, South Carolina. The new facility, located at 2355 Highway 101 South, is Nadcap accredited to perform radiographic, liquid penetrant, and magnetic particle testing. Nadcap merit is awarded only after a rigorous audit process conducted by the Performance Review Institute (PRI), an affiliate of SAE International. The audit assures the highest level of competence in performing the covered services and is a prerequisite for providing those services to the aerospace industry.

Robert Broaddus, president of X-Ray Industries commented: “With an established and growing manufacturing base in South Carolina and throughout the domestic southeast, our goal is to continue expanding our footprint in this region to support the various industries here that require nondestructive testing services. Opening the Greer facility is another step toward that goal.”

A privately held U.S. company, X-R-I Testing, a division of X-Ray Industries, Inc., has over 70 years of experience in providing nondestructive testing services, including radiographic, liquid penetrant, magnetic particle, eddy current, ultrasonic and thermography to the aerospace, defense, power generation, automotive, and marine industries.
